

Software Quality Engineer (m/w/d)

What we offer

- You will be part of a small team and involved in actively shaping digital transformation projects
- Our projects range from concept development to implementation and operation of new digital services and products for a range of industries (FinTech, Real Estate, HealthTech)
- You will take part in product development and management decisions
- You will work in a team with other developers, consultants, and designers to help create the best possible solution
- You will benefit from an individually setup training & development program
- You enjoy working remotely (from within the EU) or in our centrally located office in the beautiful city of Vienna
- A salary in the range of EUR 50-70k and beyond (gross) per year depending on your qualifications and experience

Your Ambitions

- You want to deliver high quality solutions for complex challenges
- You want to apply a user centric development approach
- You want to build up a development team and improve the skills of your fellow teammates
- You want to be part of a digital product team, working on eye level in an agile environment
- You are driven by what technology can do
- You have an open-minded attitude, and you are passionate about what you do
- Culture and team spirit are important for you

Your Background and Skills

- Experience reviewing software requirements and preparing test scenarios
- Knowledge of automation tools such as Cypress, WebdriverIO, Selenium, Postman
- Experience testing Native Apps (iOS/Android)

- You are familiar with performance testing and regression testing
- You have worked on agile development environments (e.g., Jira, Scrum, Confluence)

You will impress us by

- Being equally passionate and curious about the latest testing technologies
- Showing clear and strong communication skills (verbally and written) with stakeholders and team members

What we expect from you

Please apply via LinkedIn or submit your CV to viable (thomas.kolbabek@viable.at).

We appreciate it if you want to include a cover letter, references, links to side projects, and anything else you believe we should know to get to know you better.
