

JUNIOR BACKEND DEVELOPER

What we offer

- You will be part of a small team and involved in actively shaping digital transformation projects
- Our projects range from concept development to implementation of new digital services and products for a range of industries
- You will contribute to the success of a project with your technical expertise and the development of APIs
- You will work in a team with other developers, consultants and designers to help create the best possible solution
- You will benefit from an individually setup training & development program
- You will enable API-consumer projects by providing high quality APIs
- You will benefit from a wide range of tasks for many different and exciting projects
- You enjoy working in a centrally located office in the beautiful city of Vienna
- We offer a competitive salary starting at EUR 60.000,- (gross) per year depending on your qualifications

Your Ambitions

- You want to deliver high quality solutions for complex challenges
- You want to support your team and actively contribute to the success of projects
- You want to be part of a cross-functional team, working on eye level in an agile environment
- You enjoy to learn new things and to pass on your know-how to others
- You are driven by what technology can do
- You have an open-minded attitude and you are passionate about what you do
- Culture and team spirit are important for you

Your Background and Skills

- 3+ years of proven experience in programming (e.g. Java, Python, .NET), including open-source, personal or educational projects
- Completed technical education (e.g. HTL, (Business-)Computer Science)
- Technical overview and knowledge of relevant basic technologies (e.g. XML, client-server, networks)

You will impress us by

- Proven API experiences (e.g. providing or consuming REST interfaces)
- Knowledge in Business Process Modeling (e.g. BPMN)

What we need from you

Please submit your CV and a short Cover Letter emphasizing why you'd like to work for viable (hello@viable.at). You can include references, links to side projects and anything you deem important to your application.
