

SENIOR BACKEND DEVELOPER

What we offer

- You will be part of a small team and involved in actively shaping digital transformation projects
- Our projects range from concept development to implementation of new digital services and products for a range of industries
- You will take part in product development and management decisions
- You will contribute to the success of a project with your technical expertise and the development of APIs
- You will work in a team with other developers, consultants and designers to help create the best possible solution
- You will benefit from an individually setup training & development program
- You will enable API-consumer projects by providing high quality APIs
- You will benefit from a wide range of tasks for many different and exciting projects
- You enjoy working in a centrally located office in the beautiful city of Vienna
- We offer a competitive salary starting at EUR 80.000,- (gross) per year depending on your qualifications

Your Ambitions

- You want to deliver high quality solutions for complex challenges
- You want to apply a user centric development approach
- You want to build up a development team and educate the skills of your junior teammates
- You want to be part of a digital product team, working on eye level in an agile environment
- You are driven by what technology can do
- You have an open-minded attitude and you are passionate about what you do
- Culture and team spirit are important for you

Your Background and Skills

- 5+ years experience in API/EAI related projects
- 3+ API / EAI projects as technical lead
- Proven hands-on experience with API management/ process integration tools

- Extensive experience connecting to different Backend and Cloud technologies (e.g. messaging, event streaming, transactions, SAP integration, Salesforce integration, AWS, GCP, RDBS)
- Modern tooling for an agile development team (e.g. build automation, CI/CD tools, GIT, JIRA)
- Distinct communication skills, with an emphasize on „translating“ between technical and non-technical people

You will impress us by

- Cloud integration and API Management (e.g. apigee)
- API Lifecycle Management
- Enterprise Integration Pattern
- Interface & Security expertise (e.g. REST, SOAP, OpenAPI, GraphQL, OIC, OAuth2, TLS)
- Broad knowledge of industry standards for data exchange
- Knowledge Business Process Modeling and Execution (e.g. BPMN, jBPM, Camunda)

What we need from you

- Please submit your CV and a short Cover Letter emphasizing why you'd like to work for viable (hello@viable.at). You can include references, links to side projects and anything you deem important to your application.
